

First and Emergency Aid Laboratory

1. General Information

This laboratory, which allows students to learn theoretical knowledge about basic life support, first and emergency aid and practice with practical training, also allows them to develop in-ambulance intervention skills.

2. Physical Characteristics of Laboratories

-1 of Kağıthane Campus. The laboratory located on the first floor is arranged so that 25 students can work at the same time. The laboratory includes basic life support, an ambulance and first aid materials to provide first and emergency aid. Additionally, our in-ambulance equipment makes in-ambulance training more functional and practical.

Thanks to the PVC antibacterial floor covering, our students receive a healthier and safer education. Thanks to this infrastructure, our students can see basic life support, first and emergency aid and in-ambulance training more closely and put it into practice.

3. Laboratory Inventory List

NO:	PRODUCT DESCRIPTION	BRAND / MODEL	PİECE
1	Ambulance	Mercedes	1
2	Ambulance Main Stretcher		1
3	Aspiration Device Portable		1
4	Hard hat		2
5	Tarpaulin		1
6	Dynamic Mountaineering Rope 9 mm		1
7	Exercise Mat		3
8	Mountaineering Auxiliary Rope 7 mm		1
9	First Aid Backpack		1
10	Dustpan Stretcher		2
11	Combination Stretcher		1
12	KED Vest		1
13	Locking Carabiner		5
14	Vacuum Stretcher		1
15	Oxygen Tube		2
16	Spinal Trauma Board Large (Yellow)		1
17	Spinal Trauma Board Small (Yellow)		1
18	Roll Cylinder 15 x 60 cm		2
19	Stretcher		1
20	Inflatable Splint		1
21	Fire Extinguisher		1

Emergency Service Laboratory

1. General Information

This laboratory provides students with the opportunity to practice the interventions that need to be done in emergency situations and the correct use of materials used by showing first and emergency response practices in the emergency room.

2. Physical Characteristics of the Laboratory

-1 of Kağıthane Campus. The laboratory located on the first floor is arranged so that 50 students can work at the same time. The laboratory is equipped with adult, pediatric and baby CPR models for the application of emergency intervention and medical supplies. Models show CPR as well as intubation and first aid practices. Thanks to our inpatient model, our students see the most realistic education and the use of medical devices.

Thanks to PVC antibacterial floor covering, our students receive a healthier and safer education. Thanks to these opportunities, our students can easily and easily put the theoretical knowledge they have learned into practice simultaneously.

3. Laboratory Inventory List

NO:	PRODUCT DESCRIPTION	BRAND / MODEL	PIECE
1	Axillary Thermometer		3
2	Aspiration Device Portable		1
3	Baby Model	Nasco Life	1
